

Best practices

To meet the new trends in education institute organizes seminars and webinars to develop an emerging field at the intersection of multi-disciplinary understandings of culture and education which aims to explore and develop new perspectives in this area.

Title of the Practice-1

Organization of one day webinar on Puppetry & Its Integration with Teaching & Learning

Objectives of the Practice:

- To bring into consideration the use of toy based pedagogy
- To inculcate joy full learning and making the perspective teachers
- To transact valuable content to the target audience
- To promote awareness regarding use of e-resources among the students
- To inculcate joy full learning and making the perspective teachers.
- To transact valuable content to your target audience and to build up relationships and create awareness among the listeners
- To bring into consideration the use of toy based pedagogy.

Expected outcome : is that the webinar enabled us to use e-resources and enhance e-learning during the pandemic .Interaction provides opportunity to reach the target group and increase the impact of the message and posing questions increase the insight of the audience which is less feasible during physical meeting where attendees often merely listen passively.

The context:

As the webinar was to be held in the initial phase of pandemic Pooling up of the required resources was a tough task but after many sittings with the all concerned faculty members, the institute organized the webinar.

Problems encountered: Many technical problems were encountered during the webinar like voice quality, network challenges and to maintain the interest and attendance during the webinar.

Evidence of the success: The webinar was a success; nearly 200 participants were benefitted with this practice. The seminar provided an interesting and informative platform for new and existing learners. It was a great means to transact really valuable content to the target audience and to build up relationships and create awareness among the listeners. To inculcate joy full learning and making the perspective teachers trained through use of e-resources during the pandemic, the institute organised one day webinar on Puppetry & Its Integration with Teaching & Learning on 23rd June 2020. Dr. Neha Gupta Amity University, Noida, Dr. Preetam Pyari Banasthali Vidyapeeth, Jaipur were the guest speakers.

One day Webinar on “Importance of Education and Endurance to Combat Stress”

Objectives of the Practice:

- To provide a boost to the emotional and social development in the perspective teachers.
- To aware the target group regarding the benefits of positive mental health.
- To improve the emotional, psychological, and social well-being of the audience.
- To develop endurance to combat stress among the learners.

Expected outcome: was to provide a better understanding of how mental illness can affect a person's life. Mental health problems come with their own set of warning signs and risk factors. The seminar developed insight what these look like and how they can manifest from person to person which is a huge part of ensuring that those effected can get the help they need. By becoming more aware of what symptoms and warning signs to look out for, learners will be more capable of recognising and allowing them to support t if needed.

Context: Considering the mental well being, to provide a boost to the emotional and social development in the learners and in order to develop endurance for combating stress and to face the difficulties during the pandemic, institute organized at International Webinar on “ Importance of Education and Endurance to Combat Stress” on 2^{6th} June, 2020.

Problems encountered: Many technical problems were encountered during the webinar like voice quality, network challenges and to maintain the interest and attendance during the webinar

Evidence of the success: The webinar was a success; nearly 200 participants were benefitted with this practice. It helps in determine how we handle stress, relate to others, and make healthy choices.

Title of the Practice-2

Skill development:

The main objective of the Skill India programme is to provide adequate training in market-relevant skills to youth by 2022.,keeping in this view Advanced institute of Education organised skill develop programs create opportunities for the development of talent within the students .

Objective:

- To understand and appreciate the importance of skill development.
- To develop the learners into healthy, responsible and productive adults of the society.
- Promotion of life skills for enhancing positive and productive development in youth.

CONTEXT: The main objective of learning is to offer maximum opportunity for acquisition of valuable knowledge to all students or learners regardless of their economic, social, psychological, and technical problems and national issues.

Awareness Drive

- Road safety is of prime importance as **road accidents are among the biggest causes of deaths in the country**. With the number of vehicles on our roads increasing with every passing hour, it's of vital importance for everyone to have traffic awareness and understand and respect all the road safety rules in India. The most important rule of using the road is to **drive to avoid accidents or harm to other road users**. Considering this need, all the staff members and students were sensitized towards road safety by organising an FDP on **Road Safety Awareness** on 3rd Oct., 2019. Mr. Yash Pal, D. C.

Palwal and SHO Traffic, Palwal were invited to aware the staff members and students about rules and regulations of road safety.

- The major impact of plastic bags on the environment is that it takes many years to for them to decompose. In addition, toxic substances are released into the soil when plastic bags perish under sunlight and, if plastic bags are burned, they release a toxic substance into the air causing ambient air pollution. Long term usage and exposure of plastics and plastic products to high temperature can lead to leaching of toxic chemical constituents into food, drinks and water. Indiscriminate disposal of plastics on land and open air burning can lead to the release of toxic chemicals into the air causing public health hazards. Nukkad Natak in Collaboration with NGO Somarth, was organized by the institute on 10th Oct, 2019 to aware the people about harmful effects of using plastic bags.
- Blood is essential to help patients survive surgeries, cancer treatment, chronic illnesses, and traumatic injuries. This lifesaving care starts with one person making a generous donation. The need for blood is constant. But only about 3% of age-eligible people donate blood yearly. To motivate general public, students and staff members to donate blood and to aware the staff and students about their health-related issues, Mammography & blood donation camp was organised in collaboration with Rotary Club on 25th Sep., 2019.

Evidence of success: Nearly 200 participants attended in awareness drive on road safety 156 in blood donation and 17 in harmful use of plastic bags.
